SYSTEM USER MANUAL

for Admin and Staff

ADMIN

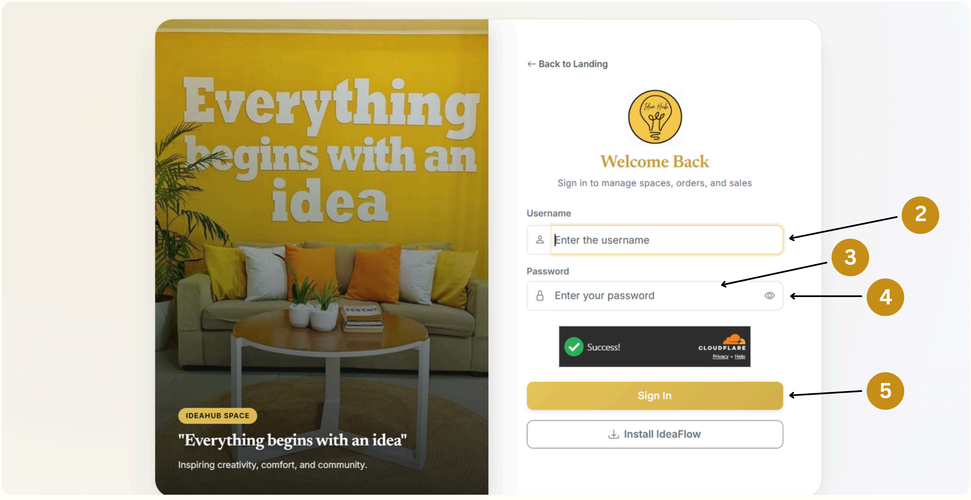

1. Log In

The Login page allows the Admin to securely access the IdeaFlow system using the provided Admin credentials and Cloudflare email verification.

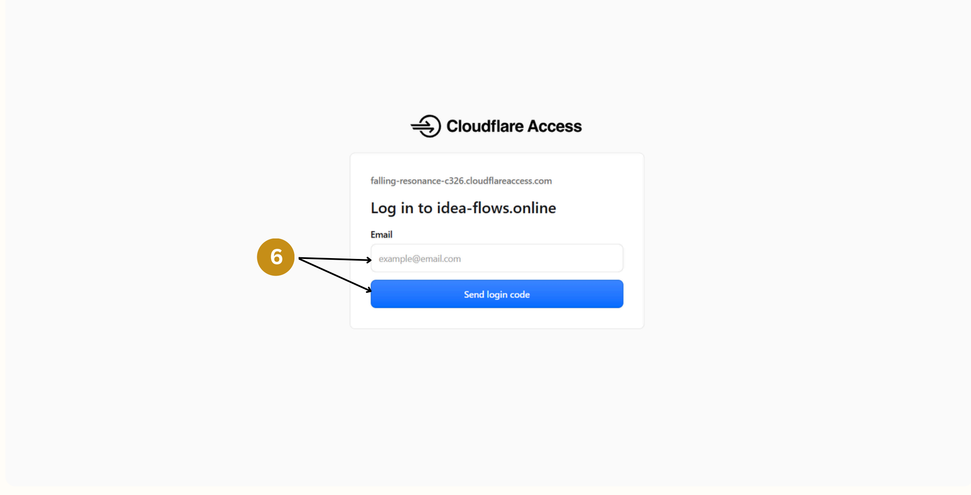

How to use it:

1. Click Log in from the landing page.

2. Enter the Username
3. Enter your password
4. Click the eye icon if you want to double-check what you typed
5. Click Sign In to continue. After submitting the Admin credentials, you will be redirected to the Cloudflare Access verification page.

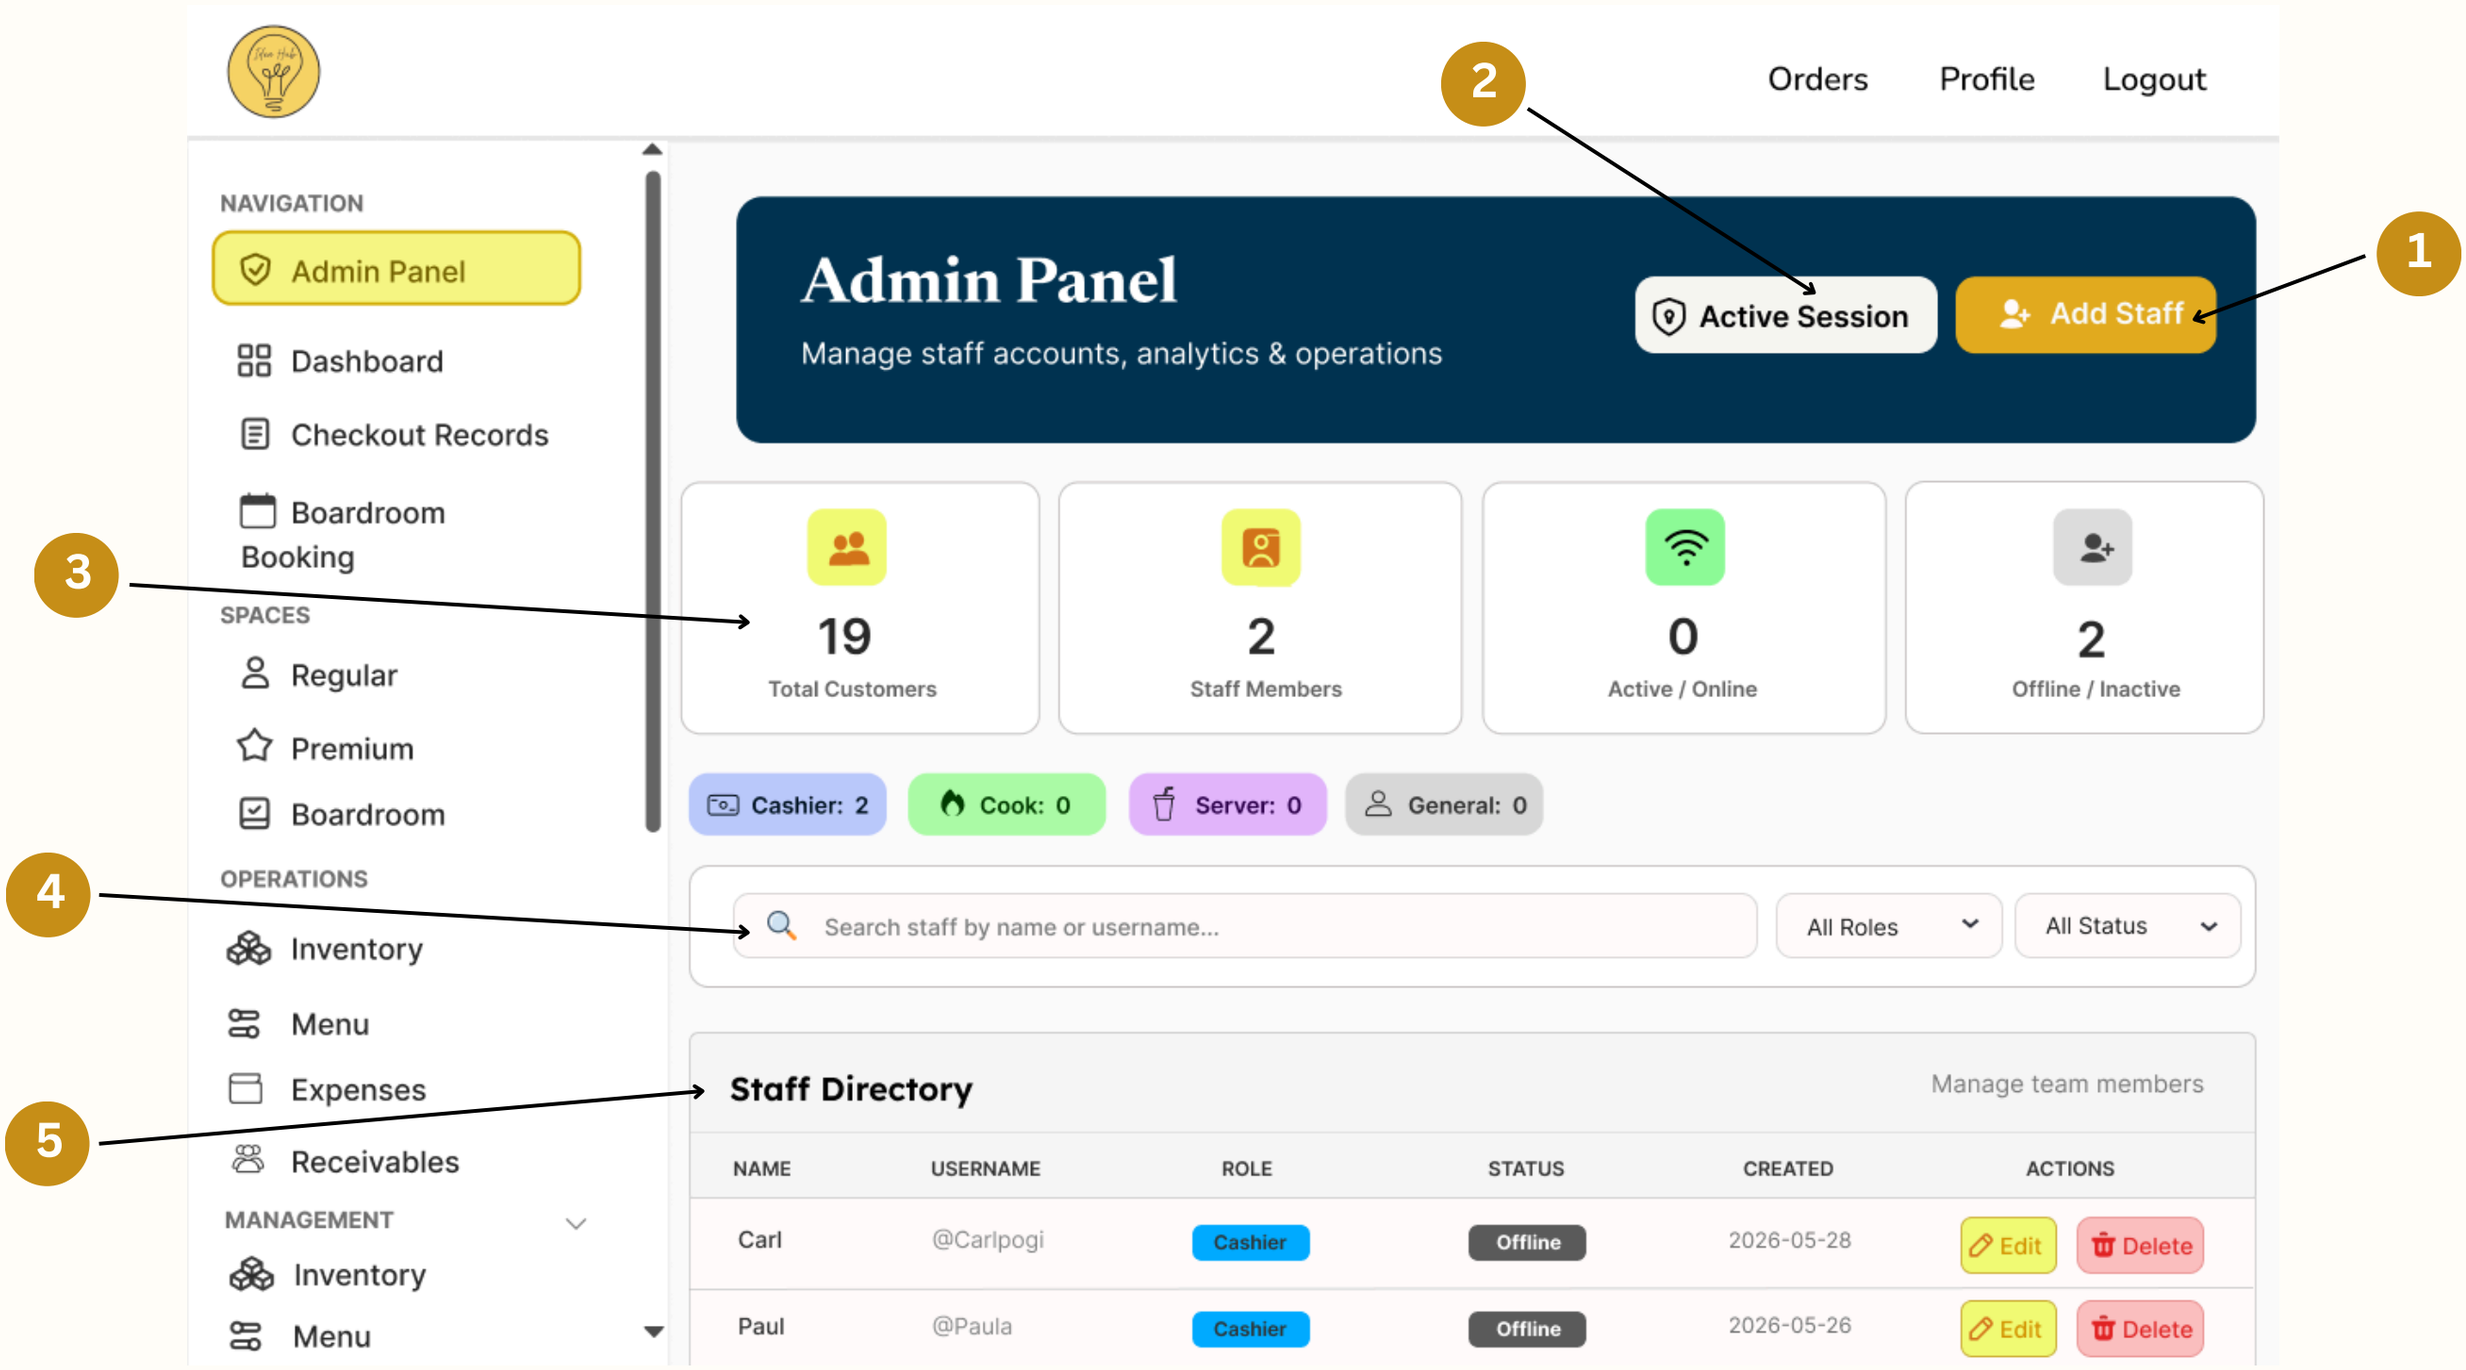

6. On the Cloudflare Access page, enter your Gmail address and click Send login code. After that, check your Gmail inbox for the verification code sent by Cloudflare. And, enter the code on the Cloudflare page.
7. If your email is authorized in the Cloudflare Access, the verification will be successful and you will be redirected to the Admin side of the system.

Expected result:

Even if the verification code is correct, you cannot access the Admin side if your email is not authorized in Cloudflare Access. In that case, you will be redirected back to the IdeaFlow login page.

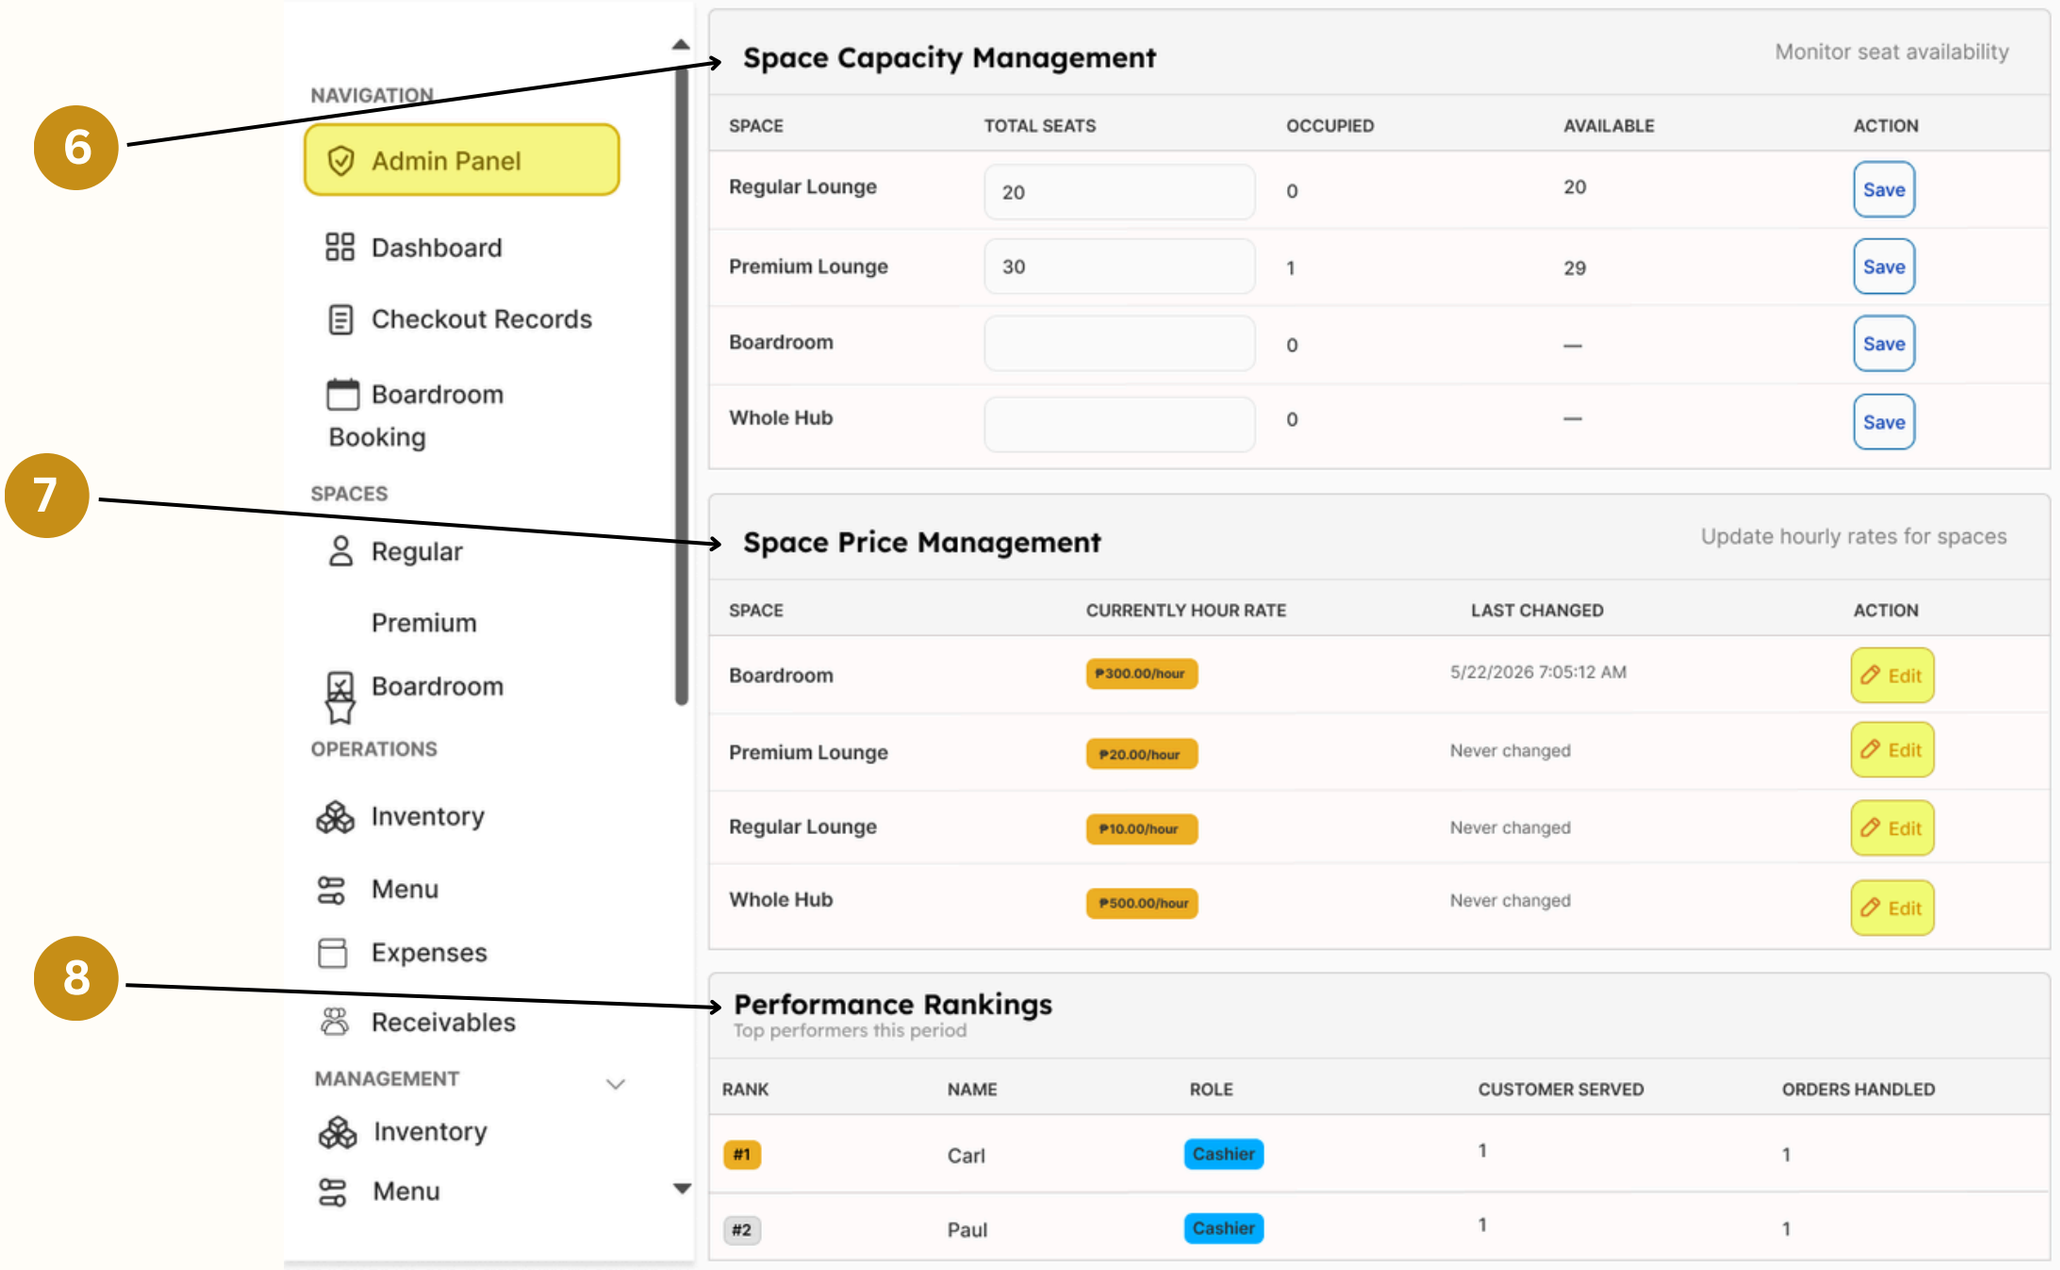

2. Admin Panel

The Admin Panel is used to manage staff accounts, monitor active sessions, and manage space capacity, pricing, and staff performance.

How to use it:

1. Click + Add Staff to add a new staff account
2. Click Active Session to view all Admin and Staff accounts currently signed in, including their names, devices used, and session status. The Admin can also sign out Staff accounts remotely when needed, especially when a Staff member is not at work, to prevent them from continuing to use the account.
3. Check the top cards for Total Customers to see their records, Staff Members for time in and time out, Active/Online, and Offline/Inactive counts.
4. Use the search bar to look up a staff member by name or username and select their roles and status
5. Use the Staff Directory table to see each staff member's Name, Username, Role, Status, and when they were Created. Then, Click Edit or Delete beside created date to update or remove that account

6 View the available spaces to monitor and manage the seat capacity of the Regular Lounge, Premium Lounge, Boardroom, and Whole Hub

7 Click Edit to change the hourly rate of a Boardroom, Premium Lounge, Regular Lounge, and Whole Hub

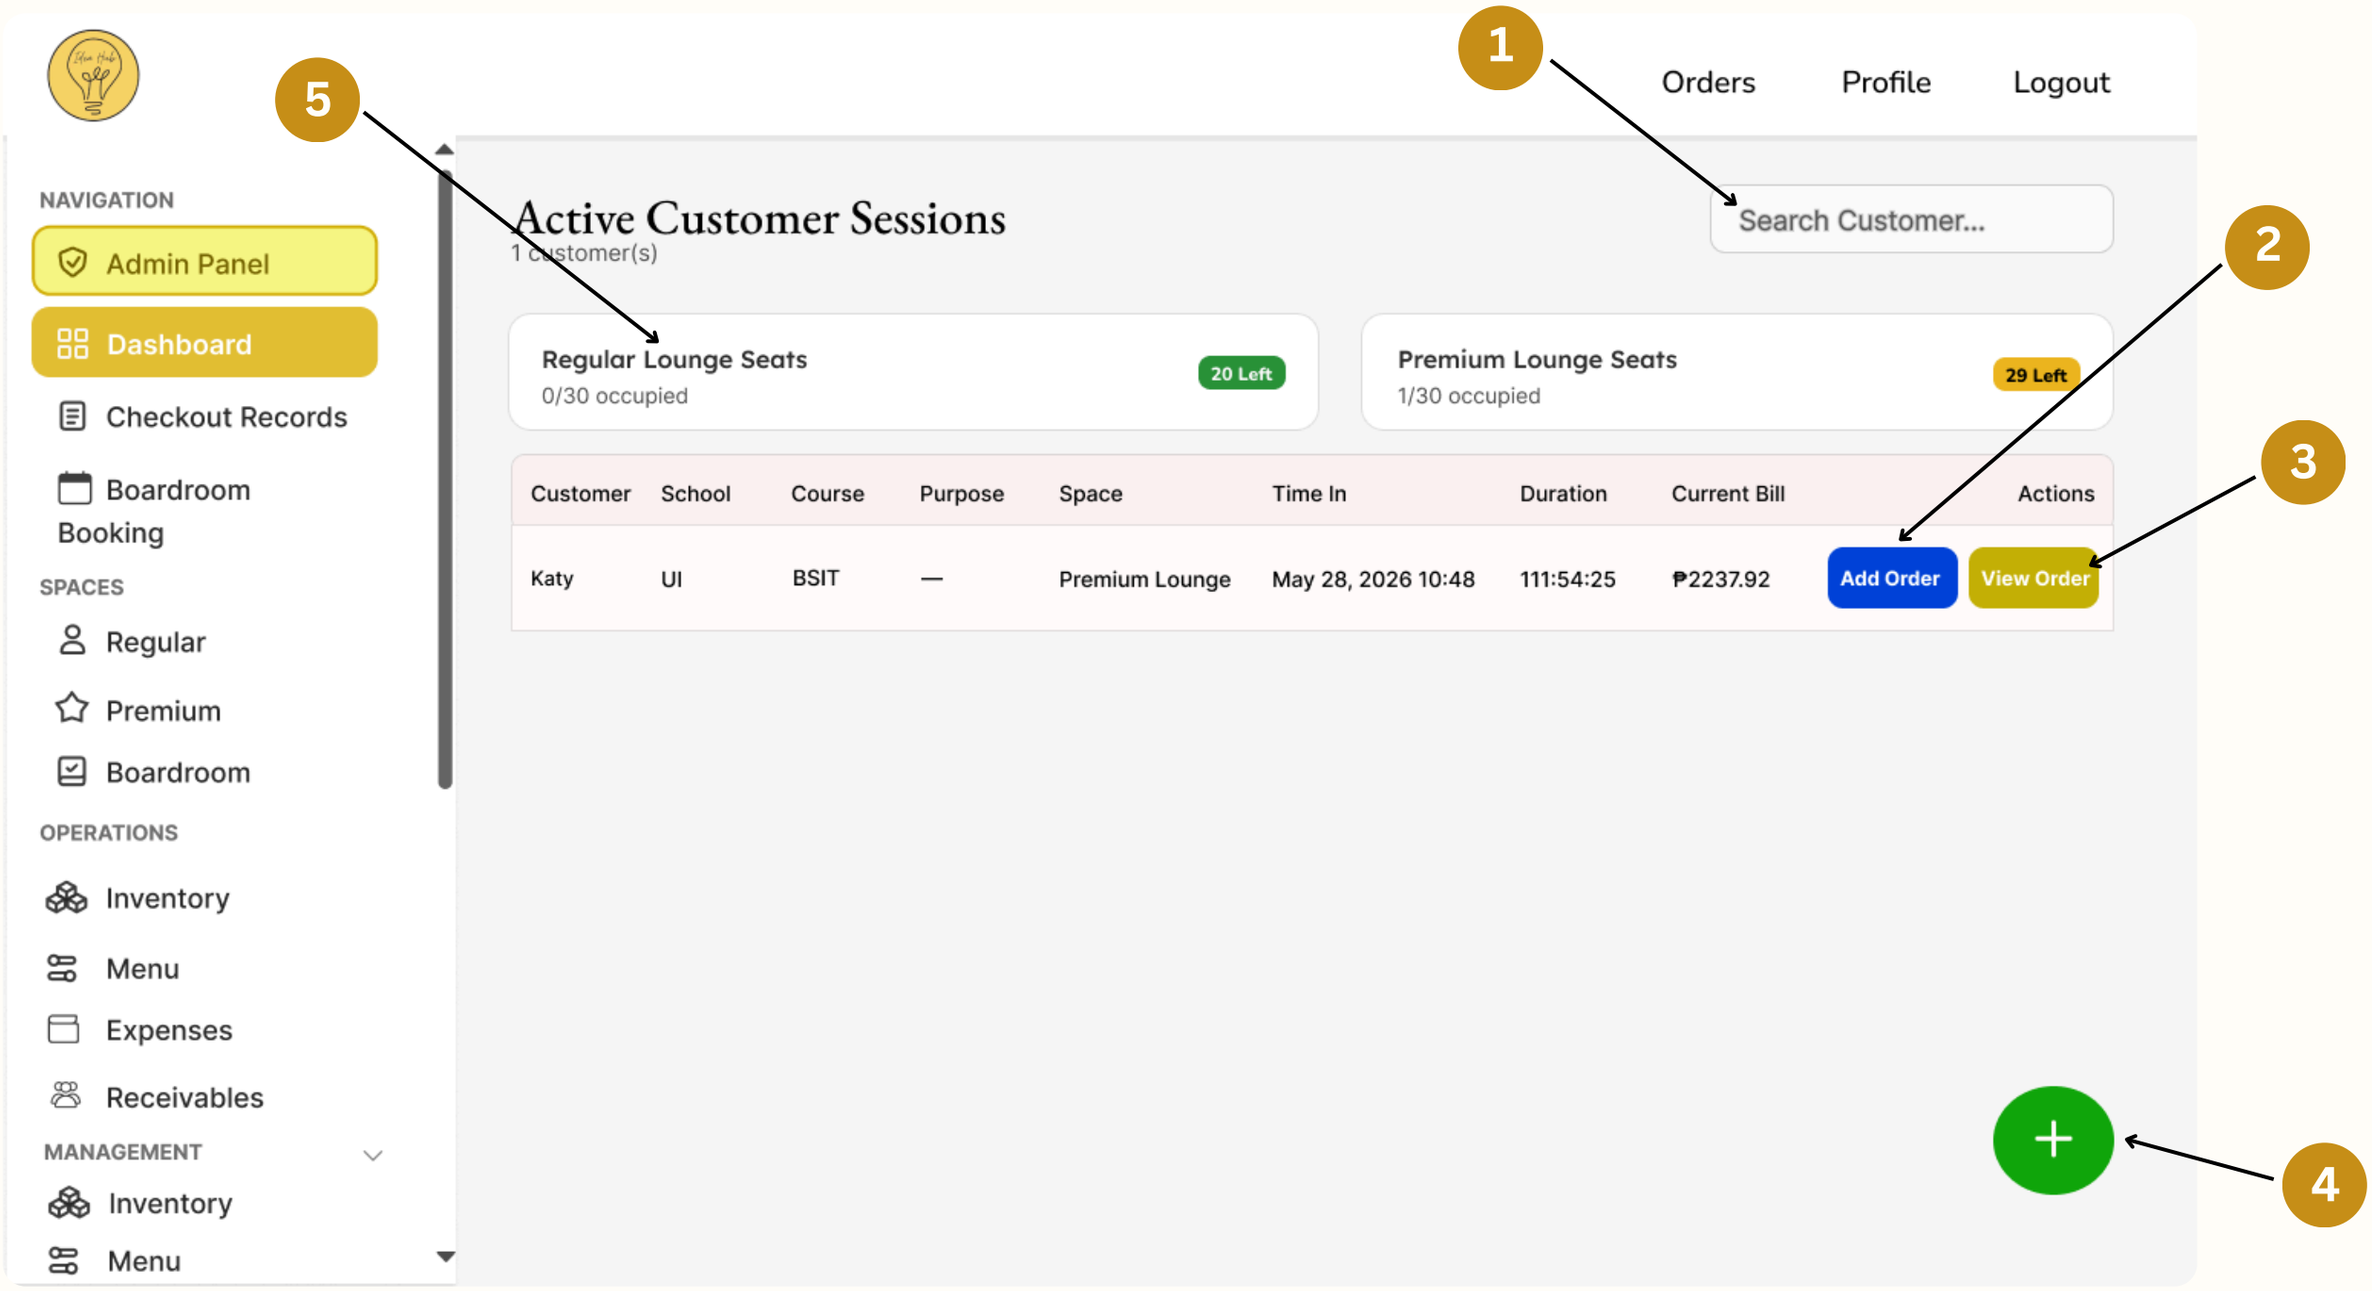

8 Check Performance Rankings at the bottom to see which staff served the most customers and handled the most orders

Expected result:

The Admin can manage staff accounts, view active sessions, monitor staff status and performance, and update space capacity and hourly rates in one place.

3. Dashboard

Dashboard gives the admin a quick view of customer sessions, available spaces, and orders

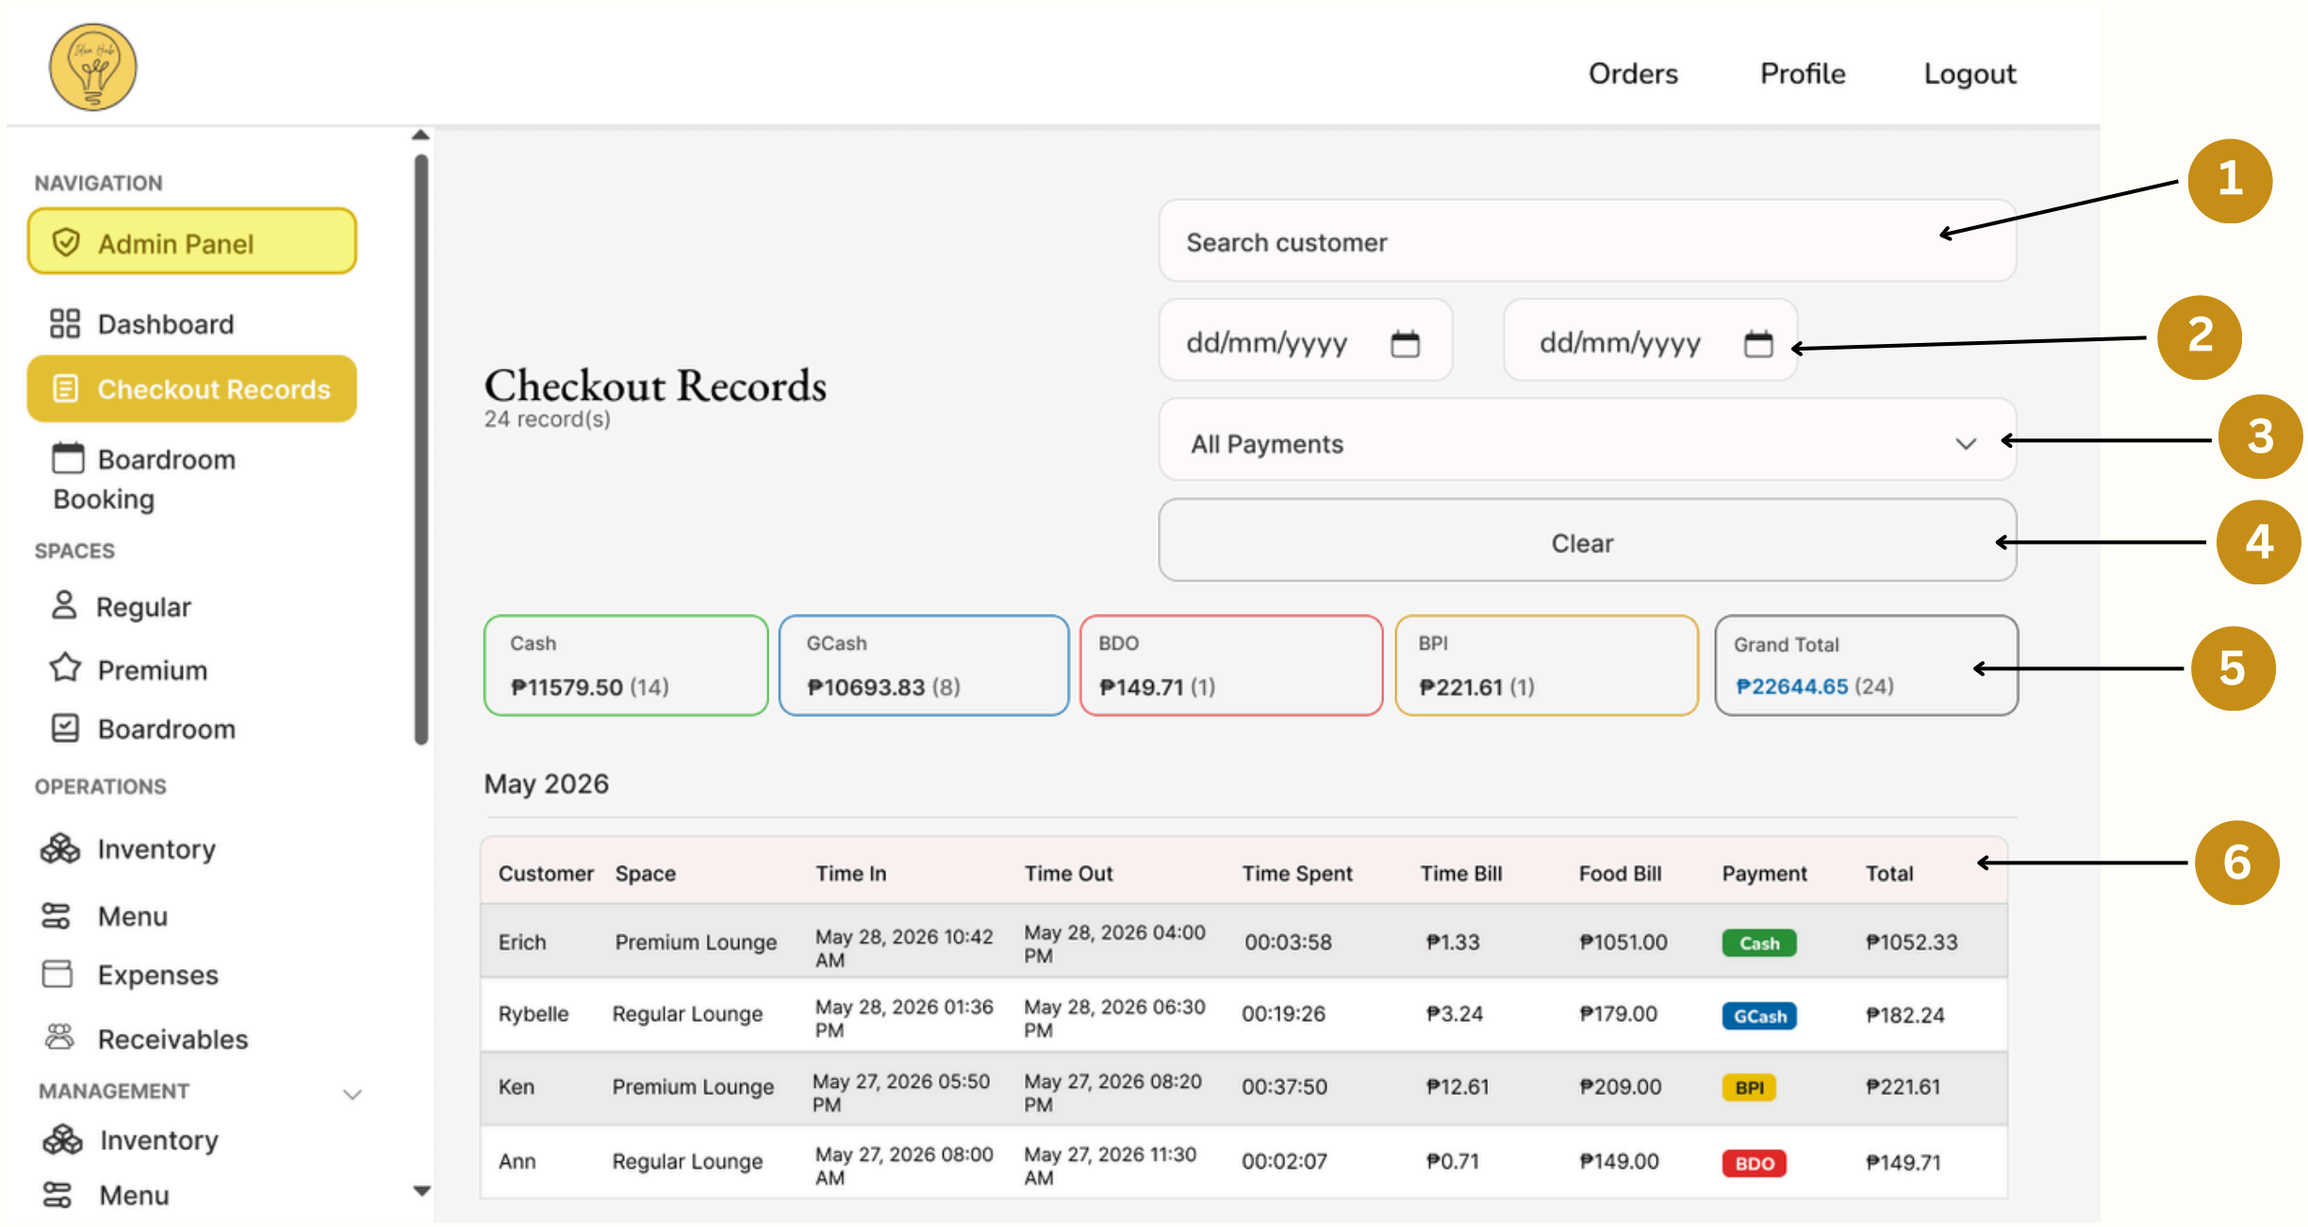

How to use it:

1. Type a name in Search Customer to look up a specific person
2. Click Add Order beside a customer to add food or drinks to their bill
3. Click View Order to see what they've already ordered
4. Click the green + button to check in a new customer
5. Shows the availability of the seats from Regular Lounge and Premium Lounge

> **Expected result:**
> The admin can quickly check customer sessions, available spaces, and order-related information from the dashboard

3. Checkout Records

Checkout Records is used to review customer checkout and payment information

How to use it:

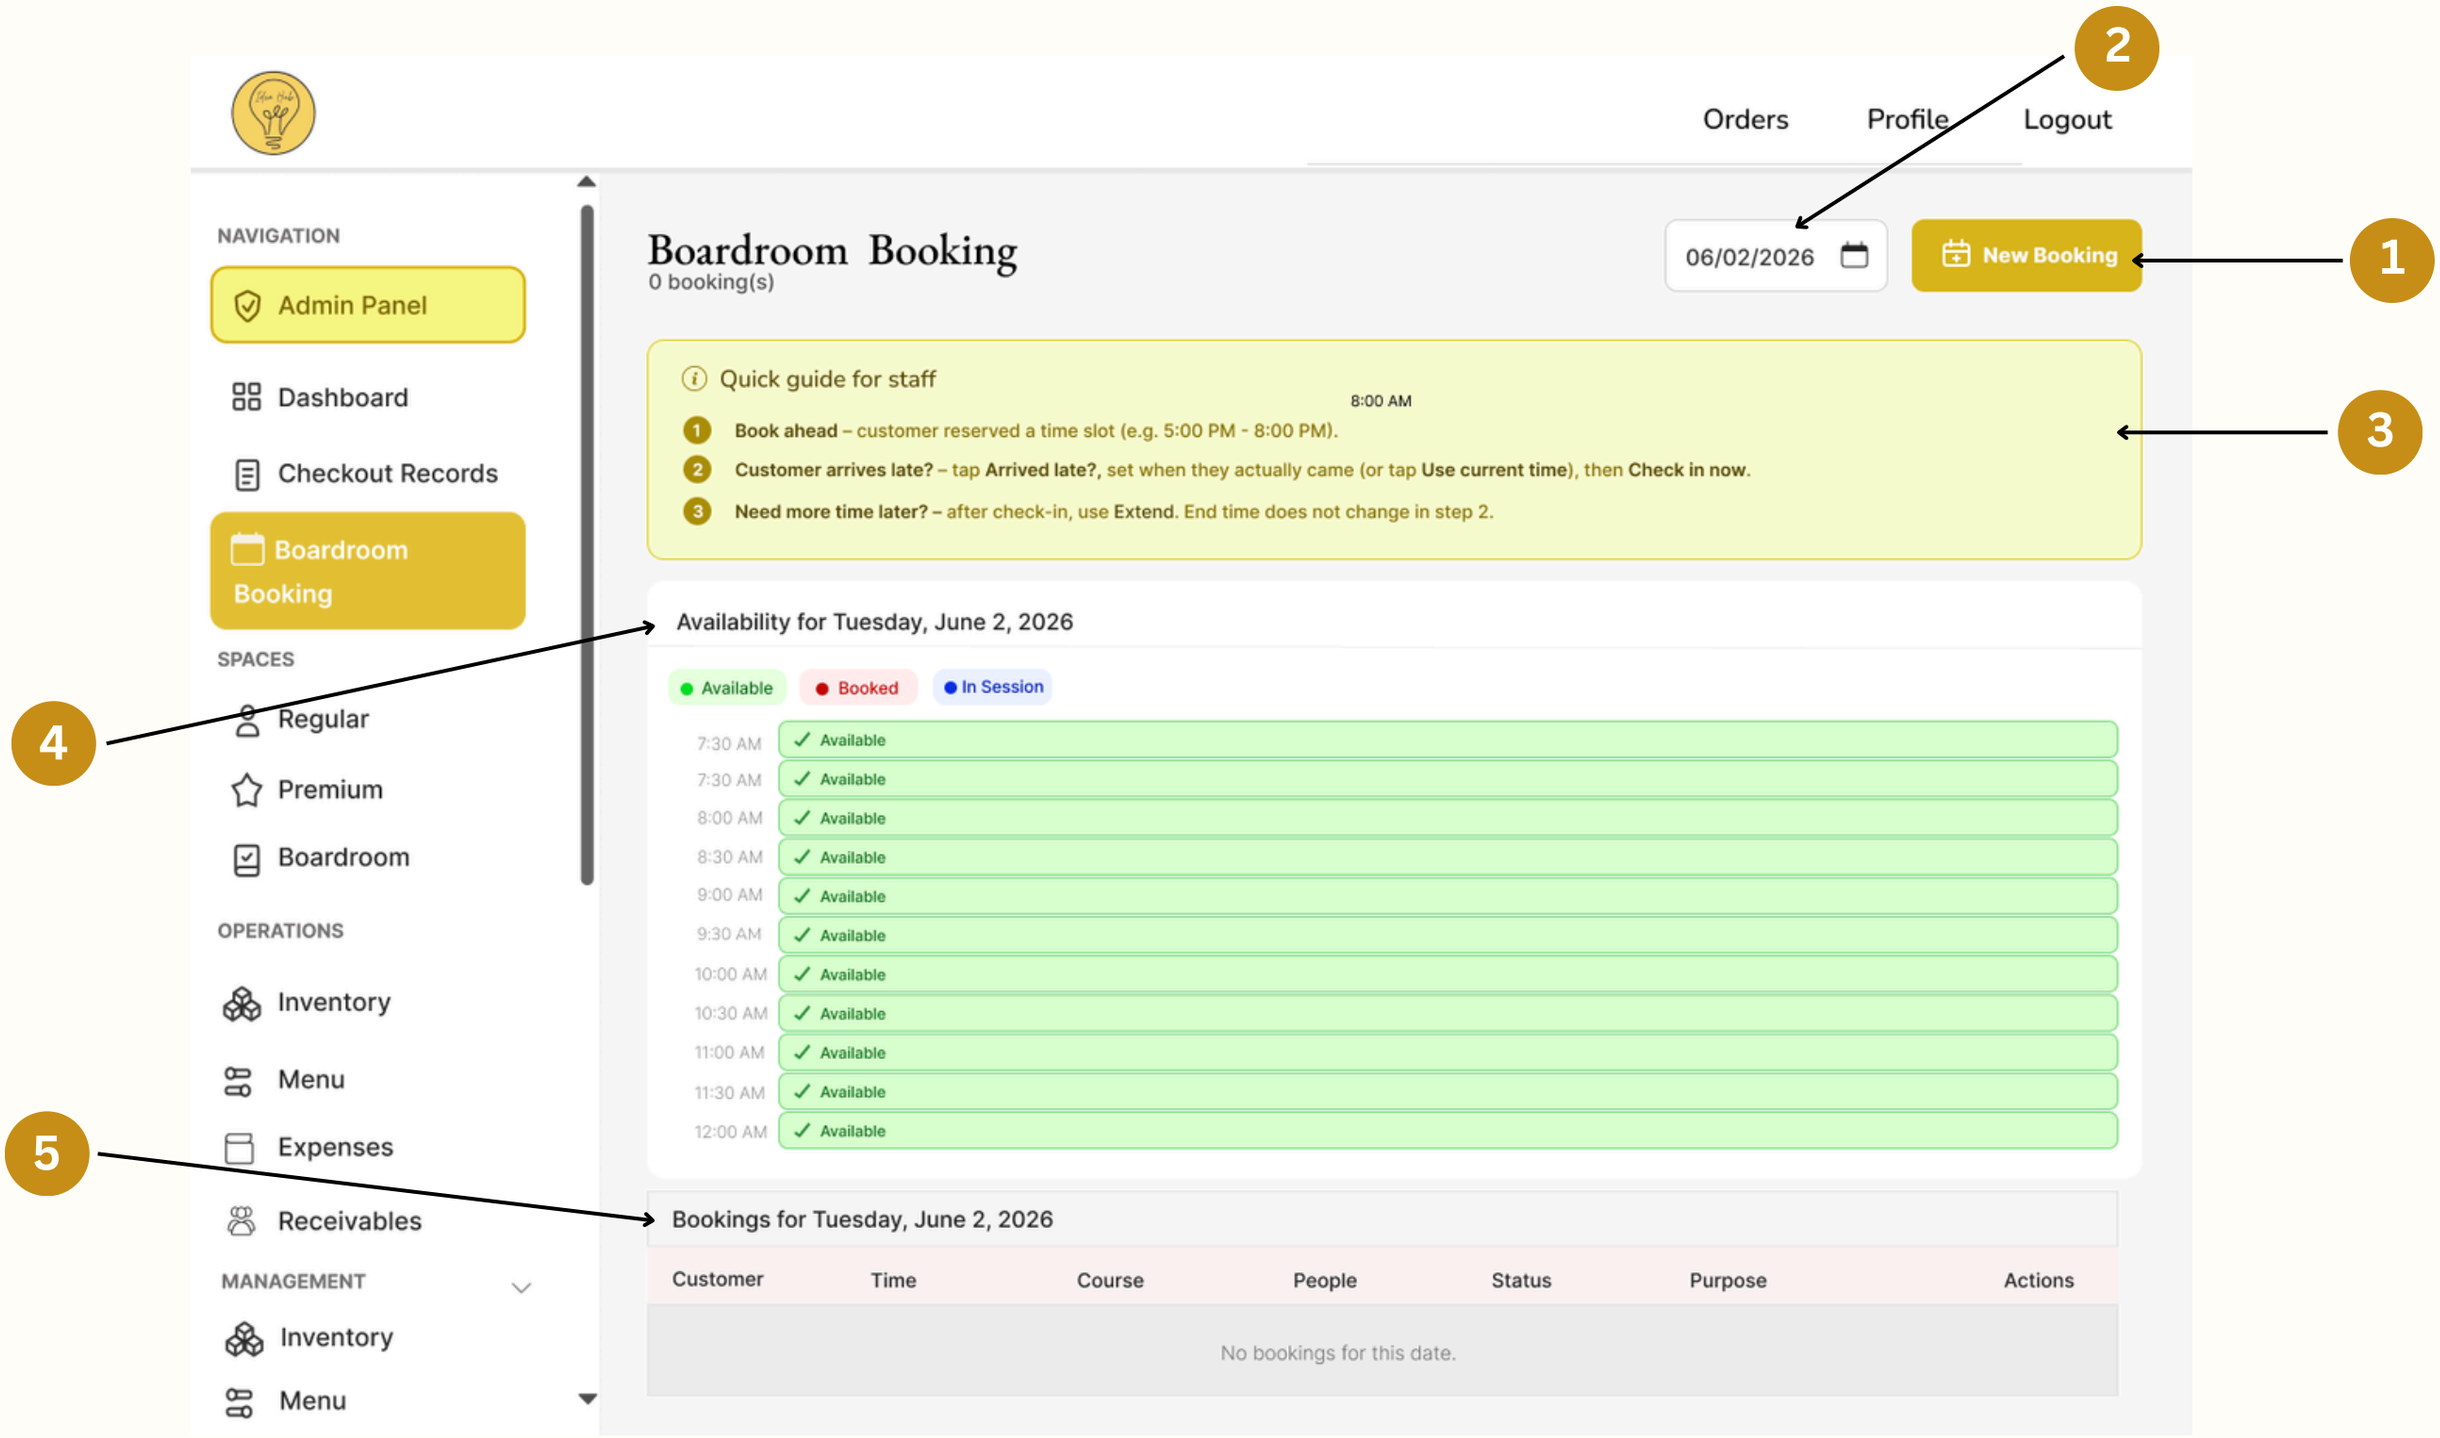

1. Use Search Customer to find the checkout records of a specific customer
2. Select a date range using the two dd/mm/yyyy boxes to see records within a specific period
3. Choose a payment method to view records paid through Cash, GCash, BDO, BPI, or other available options
4. Click Clear to remove the selected filters and view all checkout records again
5. This section shows the payment history and the total amounts paid through Cash, GCash, BDO, and BPI
6. Review the checkout table to check the customer's date, space, time used, time bill, food bill, payment, and total

Expected result:

The checkout records can be viewed based on the customer, date range, or payment method selected

4. Boardroom Booking

Boardroom Booking helps the admin check the Boardroom schedule and keep track of customer bookings

How to use it:

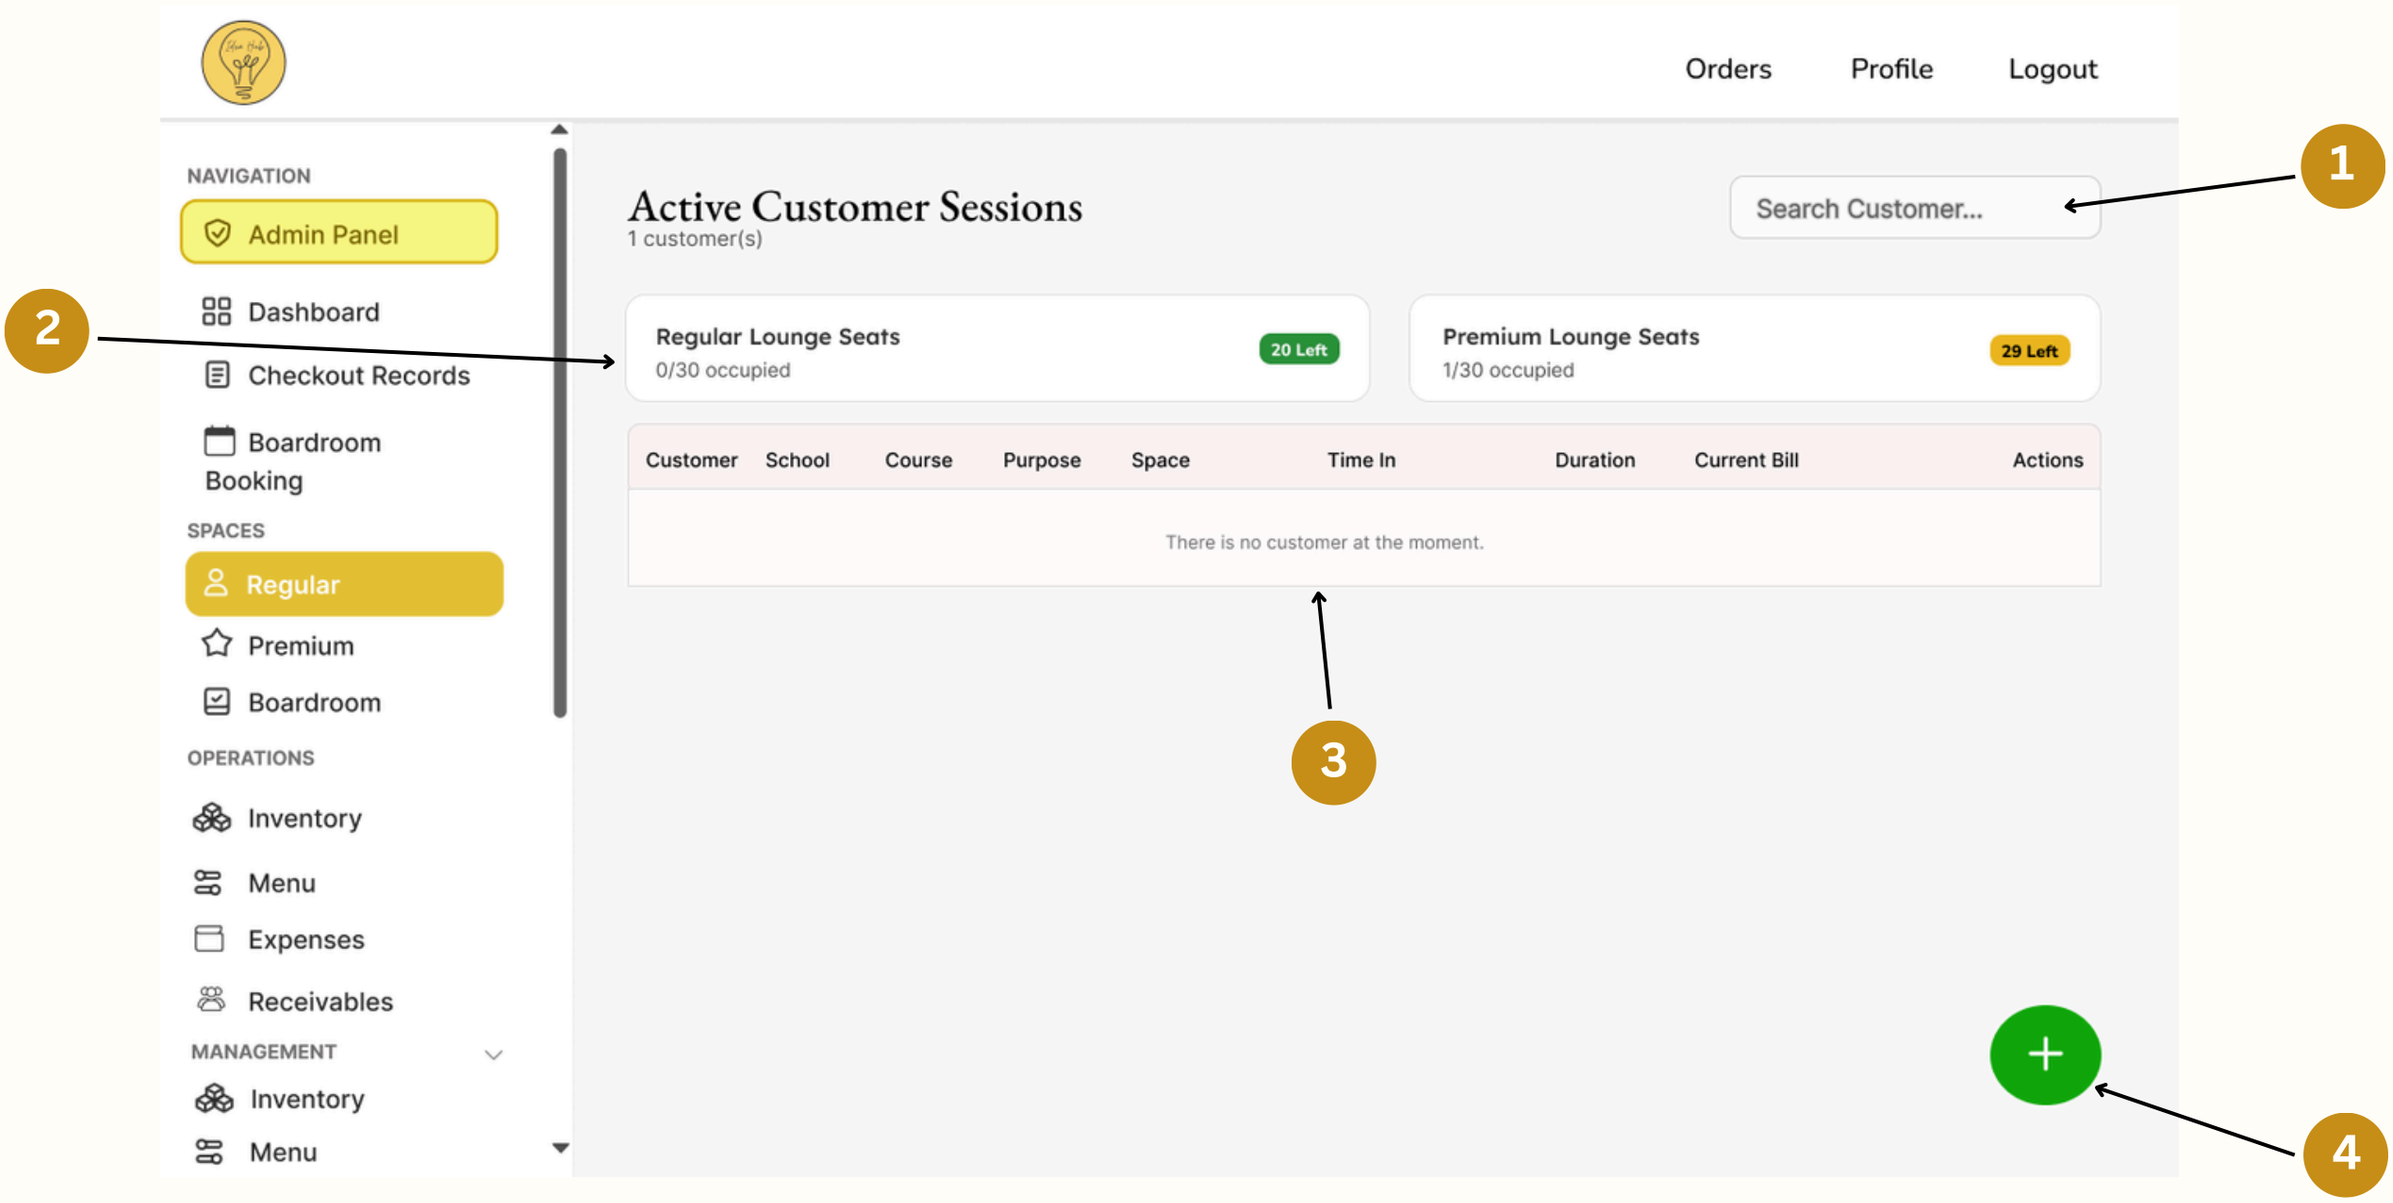

1. Click New Booking to reserve a slot for a customer
2. Select a date to see the boardroom availability for that day
3. Quick Guide for staff to follow the instructions for reserved time slots, late arrivals, and extending a session
4. Check the Availability table to see which slots are Available, Booked, or In Session
5. Review the booking list to check the customer, time, course, number of people, and booking status

Expected result:

The Boardroom schedule can be checked for available times, while existing bookings can be reviewed

5. Regular Space

Regular Space gives a quick view of the current activity and availability of the Regular Lounge

How to use it:

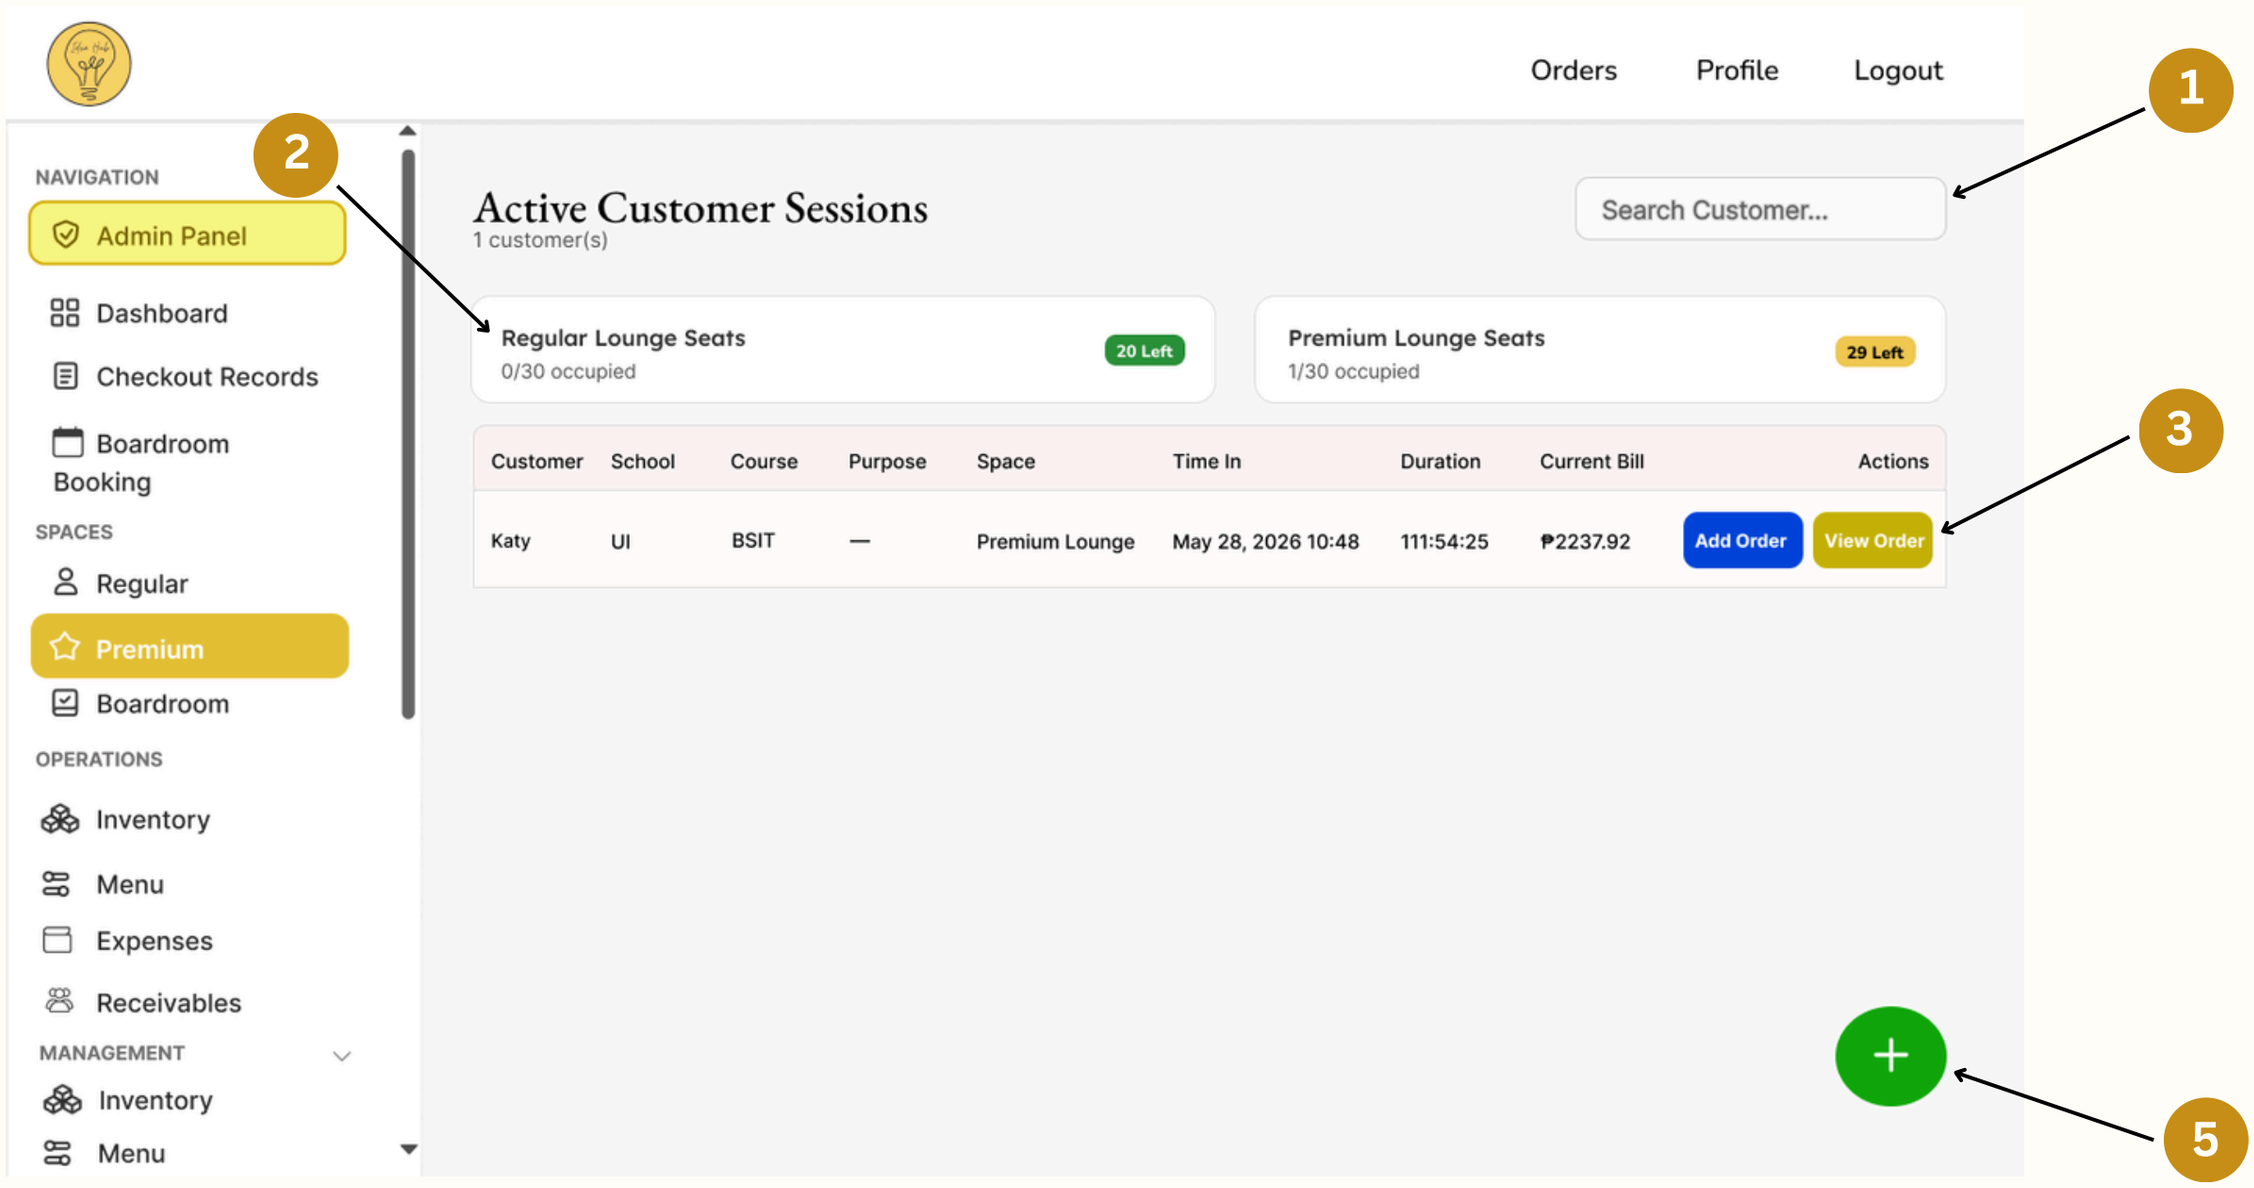

1. Use Search Customer to find a customer using the Regular Space
2. Shows the current availability of the seats from Regular Lounge and Premium Lounge
3. Display no customer at the moment
4. Click the green + button to check in a new customer into this space

Expected result:

The admin can check the Regular Lounge availability, current customer sessions, and related orders

6. Premium Space

Premium Space gives a quick view of the current activity and availability of the Premium Lounge

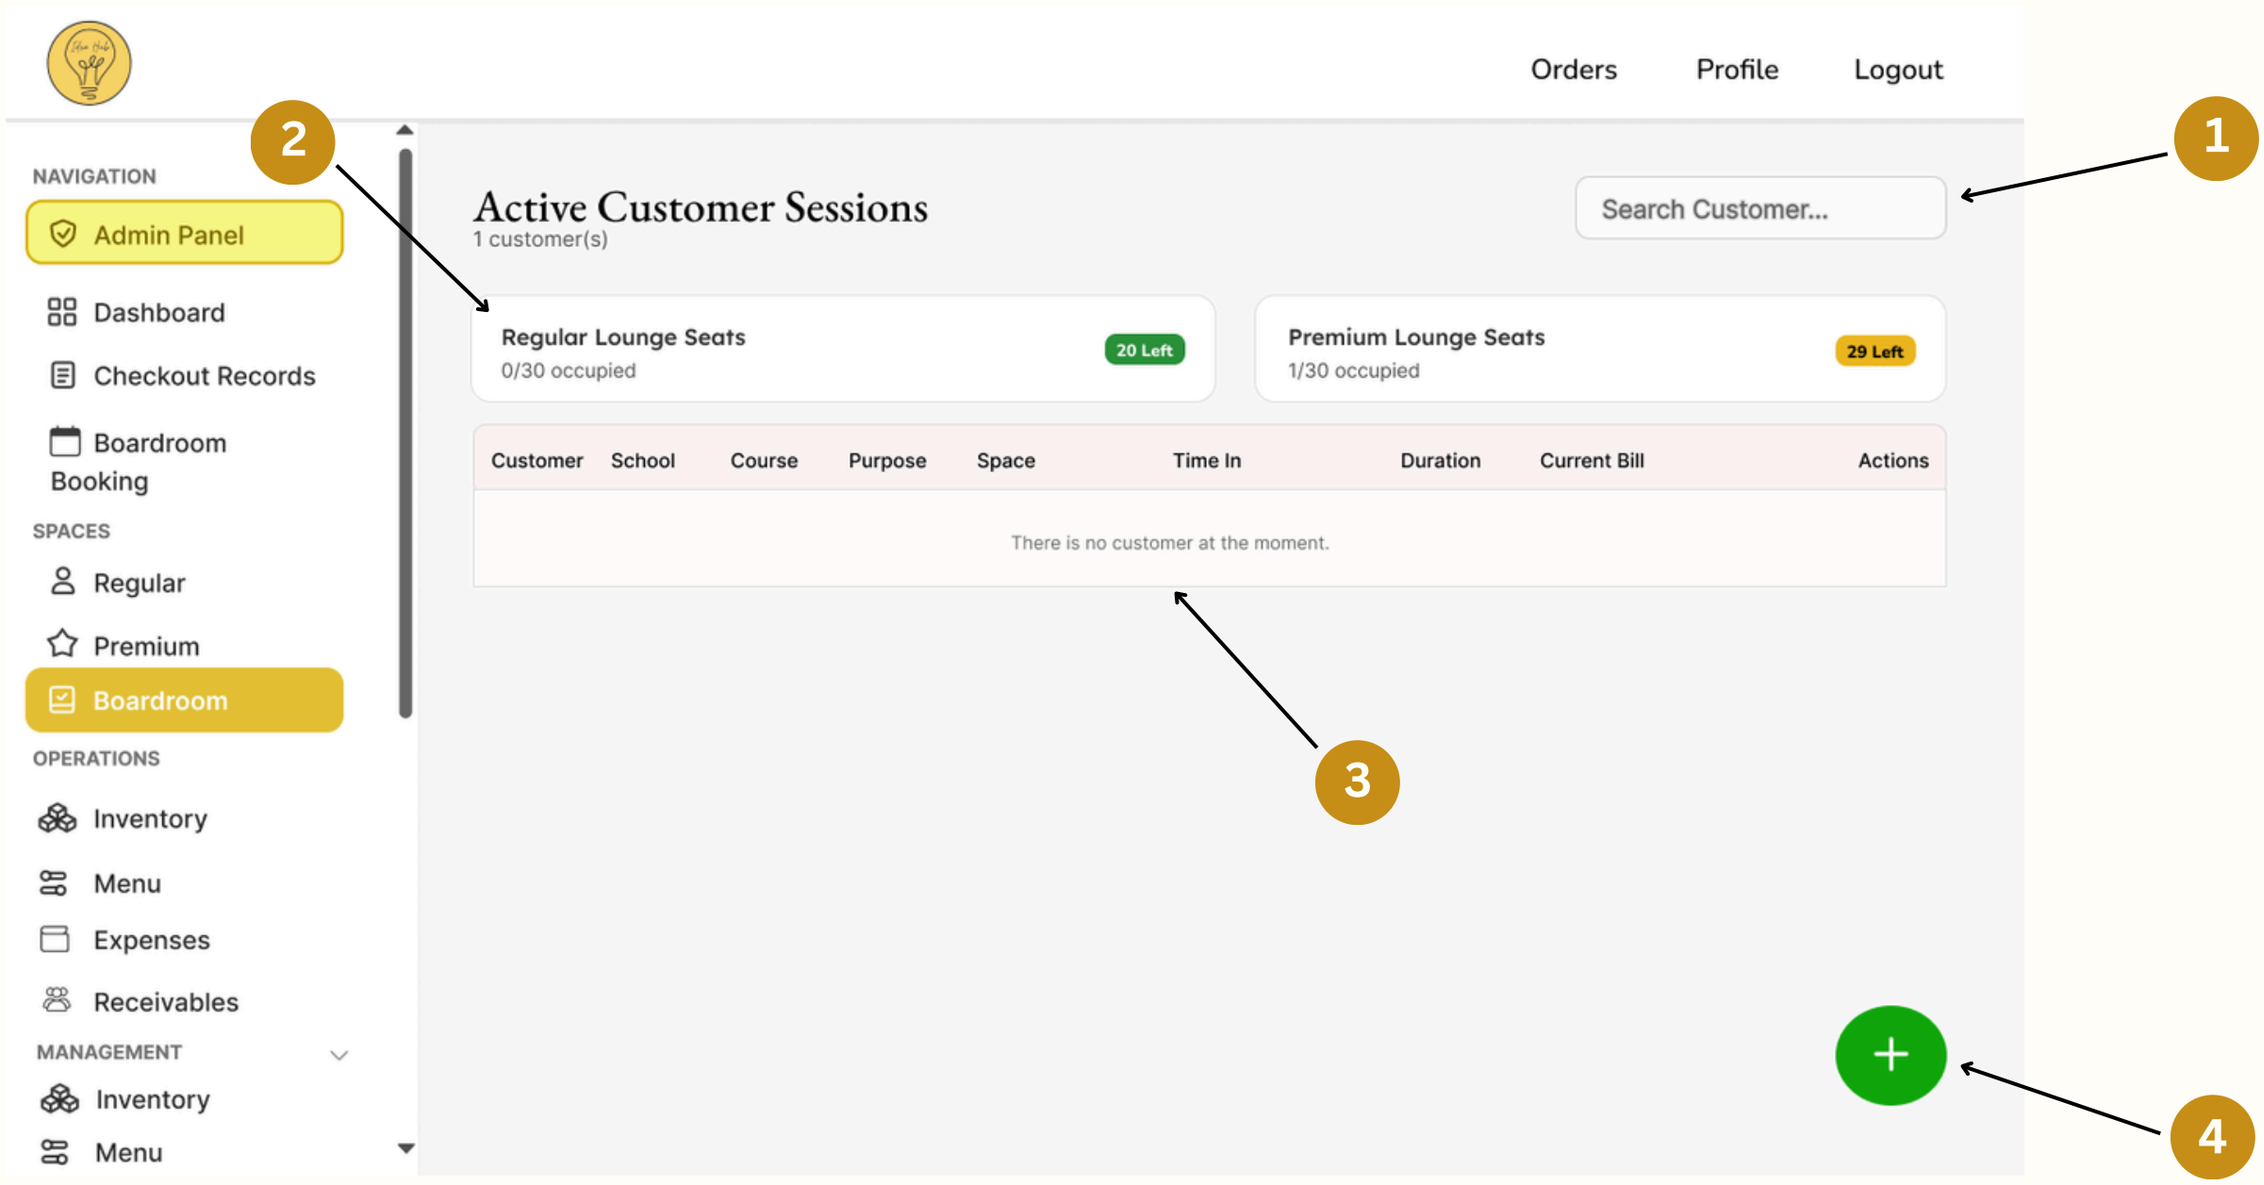

How to use it:

1. Shows the current availability of the seats from Regular Lounge and Premium Lounge
2. Use Search Customer to find a customer using the Premium Space
3. Click Add Order to add an order for the customer and View Order to see what they've already ordered
4. Shows the customer's checked-in
5. Click the green + button to check in a new customer into this space

> **Expected result:**
> The admin can check the Premium Lounge availability, current customer sessions, and related orders

7. Boardroom Space

Boardroom Space gives a quick view of the current activity and availability of the Boardroom

How to use it:

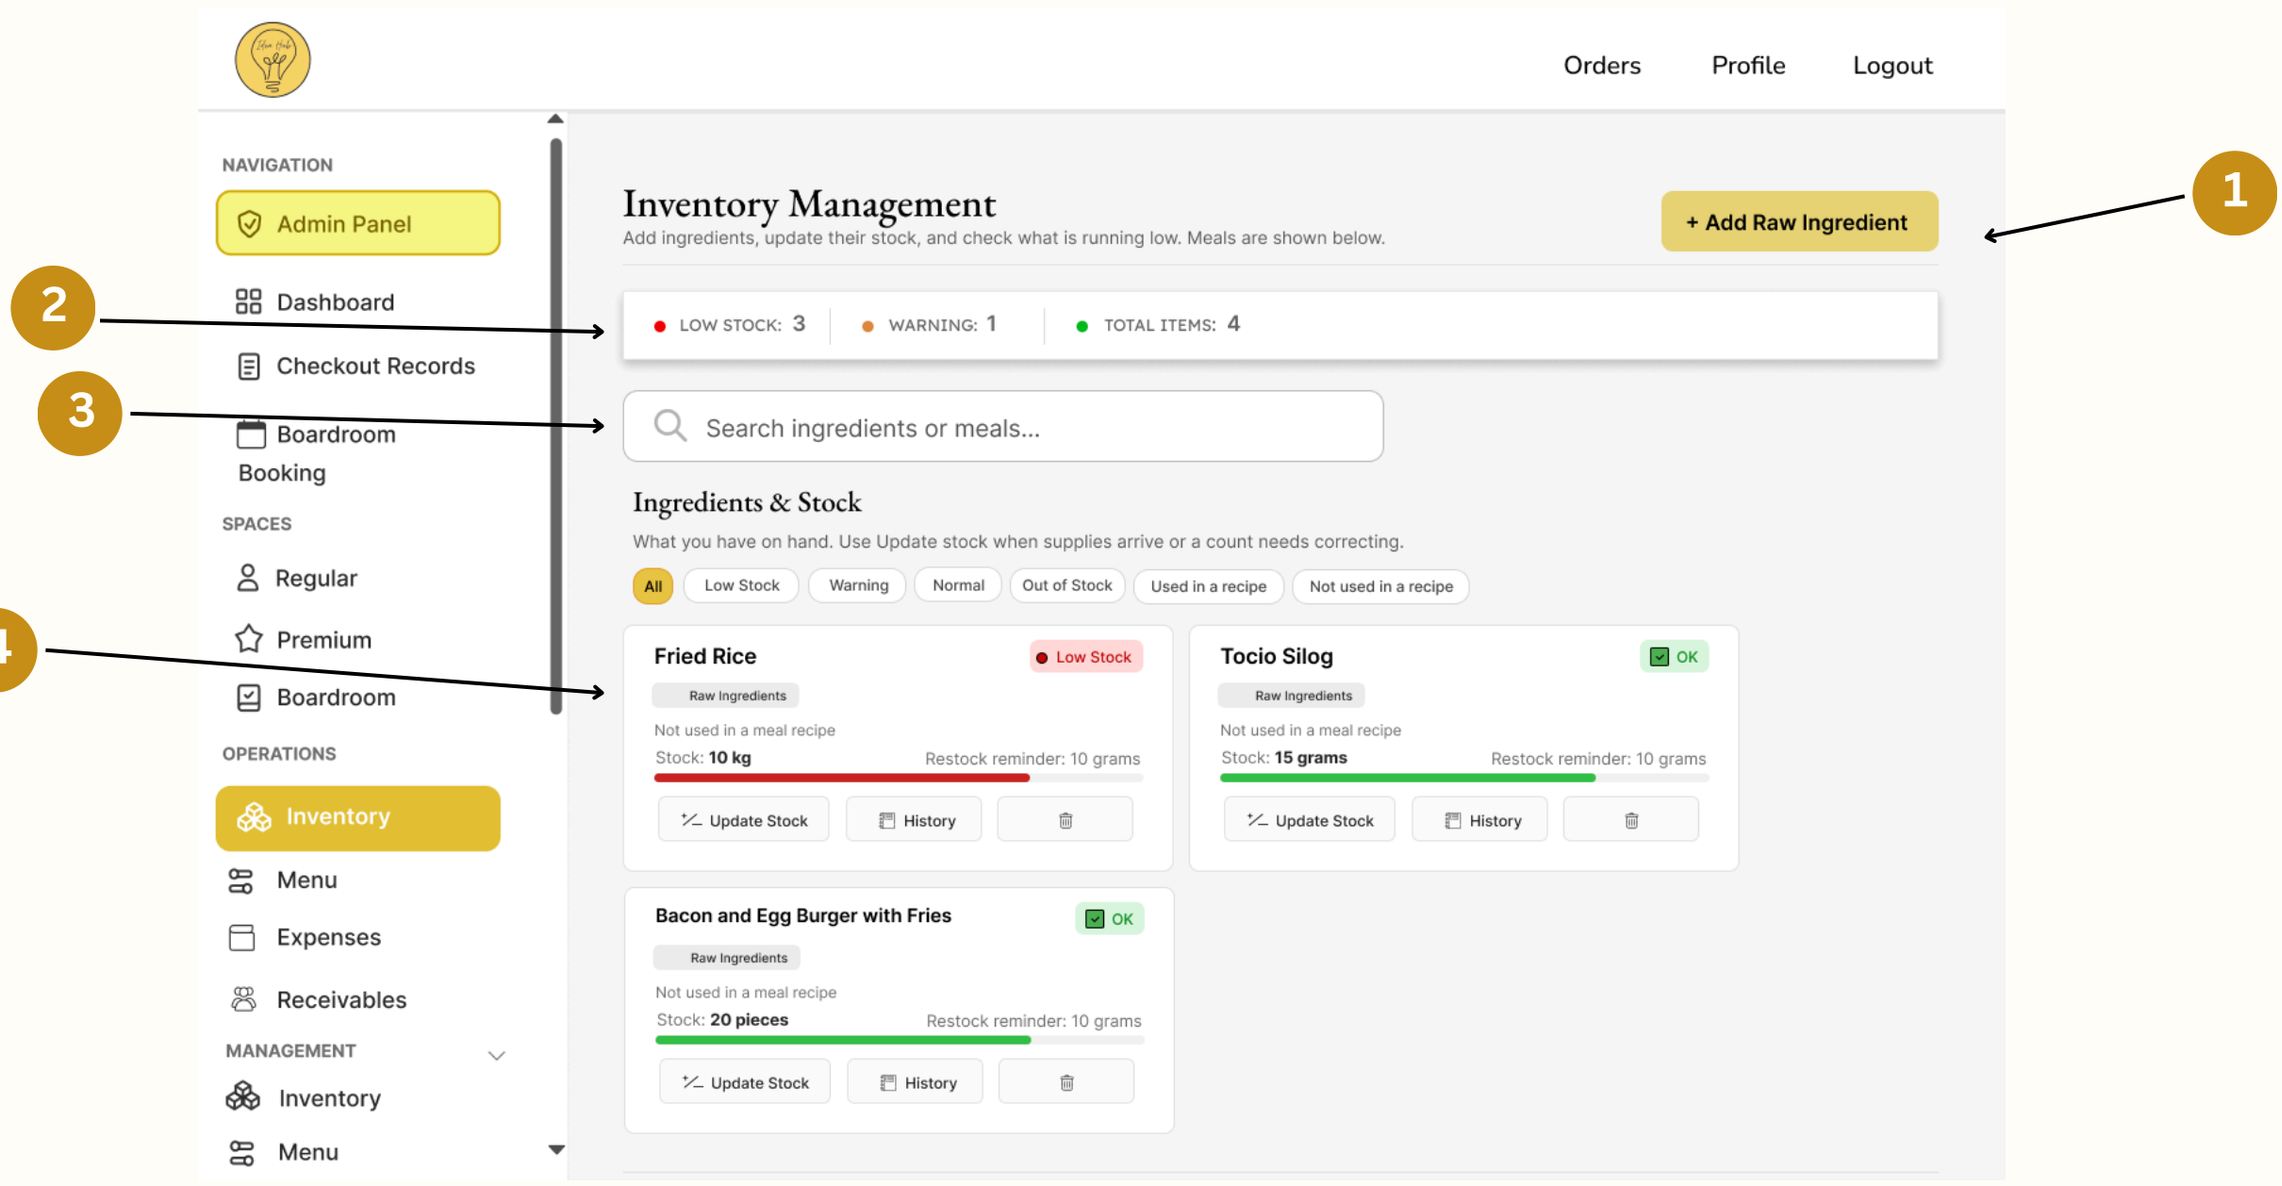

1. Shows the current availability of the seats from Regular Lounge and Premium Lounge
2. Use Search Customer to find a customer using the Boardroom space
3. Display no customer at the moment
4. Click the green + button to check in a new customer into this space
